## Introducing the Next-Generation ELAC Debut 3 Subwoofers

Immerse yourself in deep, powerful bass with the new ELAC Debut 3 Subwoofers. Designed to complement the Debut 3 series, these subwoofers, available in 10", 12", and 15" models, blend precision engineering with elegant design.

Built with custom drivers and high-efficiency Class D amplifiers, they deliver tight, distortion-free low frequencies that bring your favorite music and movies to life. Whether you seek subtle bass enhancement or room-shaking impact, the Debut 3 Subwoofers provide tailored performance with smart connectivity and refined aesthetics.

Elevate your audio experience with ELAC—where power meets passion.

● **Sealed Cabinet Design** – Experience tight, accurate bass with no unwanted resonance. The sealed enclosure ensures low distortion and fast transient response, delivering natural, articulate low-end frequencies that blend seamlessly with your main speakers

● **Custom Drivers** – Every component of the Debut 3 subwoofers is meticulously designed to deliver deep, dynamic bass with exceptional precision and minimal distortion. Engineered for high excursion, our drivers produce powerful, crystal-clear sound even at high volumes. The lightweight yet rigid polypropylene cone, featuring a textured surface, enhances structural integrity and ensures superior sound clarity.

● **Auto On/Off** – The Debut 3 subwoofers are designed with convenience in mind. The auto signal detection feature powers the subwoofer on when it detects an audio signal and switches it off when idle, ensuring energy-efficient operation without manual intervention.

● **Class D Amplification** – Feel the power and precision of our Class D amplifiers, which deliver clean, high-output performance while remaining cool and efficient. Get instant, punchy bass without power-hungry inefficiencies.

● **High Level In/Out** – Seamless integration with any system. Whether you're connecting to an AV receiver, stereo amplifier, or other components, the high-level input and output options allow for versatile setups and optimal performance in any environment.

Designed to match the Debut 3.0 Series speakers, our subwoofers deliver balanced, room-filling bass with superior musicality and precision. Choose from 10", 12", or 15" models to fit your space and listening preferences.

Upgrade Your Sound Today!
